SOFTWARE PROJECTS

(Additional projects available on portfolio page)

Business Management Trivia Game | https://msyphus.github.io/trivia-game/

- A timed trivia game that teaches business management principles in a short, fun way for busy managers to develop their leadership skills.
- Built using HTML, CSS, Bootstrap, JavaScript, and jQuery.

Dele-gator | https://lit-brook-86234.herokuapp.com/

- A conceptual app for a virtual delegation assistant to help managers find the right employee for specific projects by matching projects with employees based on expertise and personality to ensure success of the project and satisfaction of the employee.
- Built using HTML, CSS. JavaScript, jQuery, Node.js, and Express.js.

EXPERIENCE

Independent Consultant, Centerville, UT **5/2019 - Present**

- Provide consulting services in software development, website design and deployment, SEO, project management, management consulting, data analysis, product development, certified quality systems, and Lean Six Sigma training.
    - Currently leading a team in an Agile environment and coordinating with outside parties to develop part of an app to improve medical record APIs.
    - Developed website and created SEO strategy for a small startup that got their site listed at the top of search results and created organic traffic.

Skretting (Corporate Headquarters), Stavanger, Norway **1/2018 - 5/2019**
Researcher (Global Project Manager)

- Served as a global project manager for projects related to new product development, production improvement, and quality testing method design:
    - Identified and resolved a long-standing product quality issue for the facility generating the most revenue in the company worldwide.
    - Created two new product quality testing methods for global implementation.
    - Collaborated with other departments to launch new global product.
- Trained local staff in statistical analysis and R programming to increase professional competence throughout the department.
- Provided technical support, consultation, and data analysis services to production, laboratory, and research facilities on every continent to help them better understand their processes and make improvements for product quality and productivity.

Skretting (USA), Tooele, UT **7/2014 - 12/2017**
Quality Manager and Formulator

- Managed local projects related to implementing new quality management systems, continuous improvement, and product development.
    - Developed a software solution that allowed increased data integrity and business intelligence reporting while mistake-proofing inline quality testing procedures.
    - Led cross-functional teams to increase the number of certified quality management schemes for our plant by 400%.
- Streamlined IT support for the facility to quicken response times and educate users.
- Turned around management of labeling software, programming, and training to allow for sustained improvement in label integrity and employee competence.
- Analyzed data to identify and resolve root causes of operational issues.
- Turned around department by reducing operational expenses by 28%, establishing interdepartmental collaboration, streamlining efficiency, and creating a competent team.
