# MARK SYPHUS

mark.syphus@gmail.com | 385-266-7979 | Centerville, Utah

Continuous Improvement expert with a background in data analytics, quality management, and project management. Lean Six Sigma Master Black Belt experienced with over 15 different certified quality management schemes and governmental regulatory programs (including ISO 9001, HACCP, CFR 21). Currently providing consulting services in continuous improvement, quality management systems, and product development. Previously led diverse projects with cross-functional teams spanning every inhabited continent in addition to leading a local quality department. Frequently complimented for clear presentation and training techniques.

## PROFESSIONAL SKILLS

- Process Engineering
- Lean Six Sigma
- Project Management (Lean Six Sigma, Agile)
- Statistical Analysis
- Root Cause Analysis
- Computer Literacy (Microsoft Office, databases, R, SQL, etc.)
- Certification Schemes and Regulatory Standards

## EXPERIENCE

**Independent Consultant,** Centerville, UT **5/2019 - Present**

- Provide consulting services in Lean Six Sigma, certified quality management systems, project management, data analysis, and product development:
    - Provided curriculum development and instructional support for Lean Six Sigma certification courses.
    - Coached an executive team of a multi-million dollar company to create a data collection and analysis plan for identifying new product markets and customer requirements in order to create a new product.
    - Designed and implemented a certified American Welding Society quality management system for a metals powder coating company and provided an ISO 9001 readiness assessment.
    - Served as project manager to develop part of a software app to improve medical record reporting in accordance with FHIR specifications.

**Skretting (Corporate Headquarters),** Stavanger, Norway **1/2018 - 5/2019**

*Researcher (Global Project Manager)*

- Trained local staff, including global process engineers, in Lean Six Sigma, statistical analysis, and R programming to increase department competence and introduce a continuous improvement culture.
- Served as a global project manager for projects related to process improvement, new product development, and quality testing method design:
    - Used statistical analysis to identify and resolve a long-standing product quality issue for the facility generating the most revenue in the company worldwide.
    - Created two new product quality testing methods for global implementation.
        - Involved extensive experimental design and statistical analyses to perform reliable Measurement System Analysis.

- Provided technical support, consultation, and data analysis services to production, laboratory, and research employees (management to front-line) on every continent to help them better understand their work processes and make improvements for product quality and productivity.

**Skretting (USA),** Tooele, UT **7/2014 - 12/2017**
*Quality Manager and Formulator*

- Managed local projects related to continuous improvement, implementing new certified quality management schemes, and product development:
    - Collected and analyzed data to identify root causes of customer complaints and production inefficiencies then led teams to solve them.
    - Developed a software solution that allowed increased data integrity and business intelligence reporting while mistake-proofing inline quality testing procedures.
    - Led cross-functional teams to increase the number of certified quality management schemes for our plant by 400% in one year.
- Performed risk assessments for biological, chemical, and physical hazards in raw materials, finished products, and operational processes.
- Enhanced management of labeling software, programming, and training to allow for sustained improvement in label integrity and employee competence.
- Redesigned the quality control inspection process to increase efficiency by 70%.
- Oversaw KPIs, quality metrics, databases and reporting to maintain control of product quality, customer satisfaction, budgets, and margins.
- Turned around department by reducing operational expenses by 28%, establishing interdepartmental collaboration, streamlining efficiency, and creating a competent team.
