LinkedIn: www.linkedin.com/in/mark-syphus-53906472/ | **Github:** https://github.com/msyphus
Portfolio: https://msyphus.github.io/

Software Engineer with a background in operations management, project management, and data analysis. Excellent combination of highly-desired technical skills and invaluable soft-skills. Efficiently led projects with cross-functional teams spanning every inhabited continent in addition to leading a local quality department. Loves to use data analytics and product development skills with a Lean flavor to develop software solutions that help organizations and individuals operate efficiently.

- **Interfaces and Databases:** APIs, Firebase, MongoDB, MySQL
- **Version Control:** Git Bash, GitHub

PROFESSIONAL SKILLS

- Department Management
- Project Management
- Product Development
- Agile
- Lean Six Sigma
- Statistical Analysis

SOFTWARE PROJECTS

(Additional projects available on portfolio page)

Business Management Trivia Game | https://msyphus.github.io/trivia-game/

- A timed trivia game that teaches business management principles. This is a short, fun way to develop strong leadership skills geared towards creating happy shareholders, employees, and customers. Managers are already busy, so a quick trivia game is an excellent way to sharpen skills in a hectic, stressful lifestyle.
- Built the application on my own using HTML, CSS, Bootstrap, JavaScript, and jQuery.

Dele-gator | https://lit-brook-86234.herokuapp.com/

- A conceptual app for a virtual delegation assistant to help managers find the right employee for specific projects. The app matches projects with employees based on technical expertise and personality characteristics to ensure success of the project and satisfaction of the employee.
- Built the application on my own using HTML, CSS. JavaScript, jQuery, Node.js, and Express.js.

EXPERIENCE

Disruptiv Innovations, Centerville, UT **5/2019 - Present**
Owner

- Developed website and created SEO strategy that got our site listed at the top of search results and created organic traffic.

Skretting (Corporate Headquarters), Stavanger, Norway **1/2018 - 5/2019**
Feed Production Researcher

- Served as a global project manager for projects related to new product development, production improvement, and quality testing method design:
    - Identified and resolved a long-standing product quality issue for the facility generating the most revenue in the company worldwide.
    - Created two new product quality testing methods for global implementation.
    - Collaborated with other departments to launch new global product.
- Trained local staff in statistical analysis and R programming to increase professional competence throughout the department.
- Provided technical support, consultation, and data analysis services to production, laboratory, and research facilities on every continent to help them better understand their processes and make improvements for product quality and productivity.

Skretting (USA), Tooele, UT **7/2014 - 12/2017**
Quality Manager and Formulator

- Developed a software application that allowed increased data integrity and business intelligence reporting while mistake-proofing inline quality testing procedures.
- Streamlined IT support for the facility to increase response times in resolving technical issues and educate local users.
- Turned around management of labeling software, programming, and training to allow for sustained improvement in label integrity and employee competence.
- Led cross-functional teams to increase the number of certified quality management schemes for our plant by 400%.
- Conducted statistical analysis projects to identify and resolve root causes of production issues.
- Turned around quality department by reducing operational expenses by 28%, establishing interdepartmental cooperation, streamlining efficiency, and creating a competent team that successfully took over when I transferred to corporate headquarters.
