SOFTWARE PROJECTS

(Additional projects available on portfolio page)

eCR Now FHIR App | https://ecr.aimsplatform.org/ecr-now-fhir-app

- An app for providing electronic case reporting of reportable communicable diseases, such as COVID-19. Served as project manager and developer for one of the agencies contracted to build this app.
- Built using Java, XML, JSON, CQL, FSH, SUSHI, and FHIR IG Publisher.

Dele-gator | https://lit-brook-86234.herokuapp.com/

- A conceptual virtual delegation assistant for assigning the right person to a project.
- Built using HTML, CSS, JavaScript, jQuery, Node.js, and Express.js.

EXPERIENCE

Independent Consultant, Centerville, UT **5/2019 - Present**

- Provide consulting services in software development, project management, data analysis, product development, certified quality systems, and Lean Six Sigma training:
  - Led a team in an Agile environment and coordinated with outside parties to develop part of an app to improve electronic medical record reporting.
  - Coached an executive team of a multi-million dollar company to create a data collection and analysis plan for identifying new product markets and customer requirements in order to create a new product.
  - Developed website and SEO strategy for a startup that got their site listed at the top of search results and created organic traffic.

Skretting (Corporate Headquarters), Stavanger, Norway **1/2018 - 5/2019**
Researcher (Global Project Manager)

- Served as a global project manager for projects related to new product development, production improvement, and quality testing method design:
    - Collaborated with other departments to launch a new global product.
    - Identified and resolved a long-standing product quality issue for the facility generating the most revenue in the company worldwide.
- Trained local staff in statistical analysis, R programming, and Lean Six Sigma to increase department competence and introduce a continuous improvement culture.
- Provided data analysis, technical support, and consultation services to production, laboratory, and research employees on every continent to help them better understand their work processes and make improvements for product quality and productivity.

Skretting (USA), Tooele, UT **7/2014 - 12/2017**
Quality Manager and Formulator

- Managed local projects related to implementing new quality management systems, continuous improvement, and product development:
    - Developed a software solution that allowed increased data integrity and business intelligence reporting while mistake-proofing inline quality testing procedures.
    - Led cross-functional teams to increase the number of certified quality management schemes for our plant by 400%.
- Streamlined IT support for the facility to quicken response times.
- Enhanced management of labeling software, programming, and training to allow for sustained improvement in label integrity and employee competence.
- Analyzed data to identify and resolve root causes of operational issues.
- Turned around department by reducing operational expenses by 28%, establishing interdepartmental collaboration, streamlining efficiency, and creating a competent team.
