SOFTWARE PROJECTS

(Additional projects available on portfolio page)

eCR Now FHIR App | https://ecr.aimsplatform.org/ecr-now-fhir-app

- An app for providing electronic case reporting of reportable communicable diseases, such as COVID-19. Served as project manager and developer.
- Built using Java, XML, JSON, CQL, FSH, SUSHI, and FHIR IG Publisher.

Dele-gator | https://lit-brook-86234.herokuapp.com/

- A conceptual virtual delegation assistant for assigning the right person to a project.
- Built using HTML, CSS, JavaScript, jQuery, Node.js, and Express.js.

EXPERIENCE

McWane Ductile, Provo, UT **7/2021 – Present**
Quality Manager

- Lead all aspects of quality assurance and quality control by managing a team of 13, collaborating with other departments and sister plants, and engineering processes:
    - Use SQL and VBA to build automated reporting tools for use in managing the department more efficiently.

Self-employed, Springville, UT **5/2019 – 12/31/21**
Consultant

- Provide consulting services in software development, project management, data analysis, product development, certified quality systems, and Lean Six Sigma training:
    - Served as project manager and developer on an Agile team to develop part of an

app to improve electronic medical record reporting.
    - Led a business unit through adjusting to and aligning processes, roles, and responsibilities with a new ERP system.
    - Coached an executive team in creating a data collection and analysis plan for identifying new markets and customer requirements to create a new product.

Skretting (Corporate Headquarters), Stavanger, Norway **1/2018 - 4/2019**
Researcher (Global Project Manager)

- Trained staff in R programming, Lean Six Sigma, and Statistics to increase department competence and introduce a continuous improvement culture.
- Served as a global project manager for projects related to new product development, production improvement, and quality testing method design:
    - Used statistical analysis and global collaboration to identify and resolve a major long-standing production issue.
    - Created a laboratory testing method that provided accurate results 92% faster than the current industry standard.
    - Participated in launching a new global product by leading research trials, collaborating with the Global Marketing Department about advertising the results, and coordinating trial runs in the pilot plant and worldwide production plants.
- Provided data analysis, technical support, and consultation services to production, laboratory, and research employees on every continent.

Skretting (USA), Tooele, UT **7/2014 - 12/2017**
Quality Manager and Formulator

- Managed local projects related to implementing new quality management systems, continuous improvement, and product development:
    - Developed a software solution that allowed increased data integrity and business intelligence reporting while mistake-proofing inline quality testing procedures.
    - Collected and analyzed data to identify root causes of customer complaints and production inefficiencies then led teams to solve them.
    - Led cross-functional teams to increase the number of certified quality management schemes for our plant by 400%.
