LinkedIn: www.linkedin.com/in/mark-syphus-53906472/ | Github: github.com/msyphus |
Portfolio: https://msyphus.github.io/

Software Engineer with a background in science, statistics, project management, and operations management. Excellent combination of highly-desired technical skills and invaluable soft-skills. Efficiently led projects with cross-functional teams spanning every inhabited continent in addition to leading a local quality department. Loves to use data analytics and product development skills with a Lean flavor to develop software solutions that help organizations and individuals operate efficiently.

TECHNOLOGICAL SKILLS

- **Languages and Libraries:** HTML, CSS, JavaScript, jQuery, R
- **Frameworks and Platforms:** Bootstrap, React.js, Node.js, Express.js, Laravel, Heroku
- **Interfaces and Databases:** APIs, Firebase, MongoDB, MySQL
- **Version Control:** Git Bash, GitHub

PROFESSIONAL SKILLS

- Agile
- Lean Six Sigma
- Project Management
- Product Development
- Statistical Analysis
- Quality Assurance

SOFTWARE PROJECTS

(Additional projects available on my portfolio page)

Business Management Trivia Game | https://msyphus.github.io/trivia-game/

- A timed trivia game that teaches business management principles. This is a short, fun way to develop strong leadership skills geared towards creating happy shareholders, employees, and customers. Managers are already busy, so a quick trivia game is an excellent way to sharpen skills in a hectic, stressful lifestyle.
- Built the application on my own using HTML, CSS, Bootstrap, JavaScript, and jQuery.

Dele-gator | https://lit-brook-86234.herokuapp.com/

- A conceptual app for a virtual delegation assistant to help managers find the right employee for specific projects. The app matches projects with employees based on technical expertise and personality characteristics to ensure success of the project and satisfaction of the employee.
- Built the application on my own using HTML, CSS. JavaScript, jQuery, Node.js, and Express.js.

EXPERIENCE

Disruptiv Innovations, Centerville, UT **5/2019 - Present**
Owner

- Developed website and created SEO strategy that got our site listed at the top of search results and created organic traffic.

Skretting (Corporate Headquarters), Stavanger, Norway **1/2018 - 5/2019**
Feed Production Researcher

- Trained local staff in statistical analysis and R programming to increase professional competence throughout the department.
- Served as a global project manager to successfully resolve a serious product quality issue with the facility generating the most revenue in the company worldwide.
- Created two new product quality testing methods for global implementation.
- Contributed to a team project to launch a new global product
- Conducted data analyses for operations throughout the world to help them better understand their processes and product quality.

Skretting (USA), Tooele, UT **7/2014 - 12/2017**
Quality Manager and Formulator

- Developed a software application that allowed increased data integrity and business intelligence reporting while mistake-proofing inline quality testing procedures.
- Streamlined IT support for the facility to increase response times in resolving technical issues and educate local users.
- Turned around management of labeling software, programming, and training to allow for sustained improvement in label integrity and employee competence.
- Led cross-functional teams to increase the number of certified quality management schemes for our plant by 400%.
- Conducted statistical analysis projects to identify and resolve root causes of production issues.
- Turned around quality department by reducing operational expenses by 28%, establishing interdepartmental cooperation, streamlining efficiency, and creating a competent team that successfully took over when I transferred to corporate headquarters.
